

Organize – Capacity Planner

CAPACITY PLANNING

Helps you manage your resource allocation for your iterations from one single place. Gives you the flexibility to track team members progress over the sprint and plan your future sprints accordingly.

RETROSPECTIVE

The retrospective is one of the most important pieces in an agile environment. Capacity Planner tool provides valuable information back to the team. You can easily compare allocation time with the actual time spent to improve the way you estimate work.

REPORTS

Time spent per Epic/Story per Release Version report helps you analyze task estimates and for accurate forecasting

Create Team/Team Members

Create any number of teams for your organization. This plugin also gives you the provision to add any number of team members to this team.

Name	Default Capacity	Deductions	Vacation	Holidays	Allocated	Available Capacity	Allocation Status	Remaining	Time Spent	Plan Variance	Action
adna	80	0	0	0	0	80	Get team?	0	0	Not Applicable	
and	40	0	0	0	0	40	Get team?	0	0	Not Applicable	

Team Member	Default Capacity (hrs)	Administer	Action
adna	80	<input checked="" type="checkbox"/>	
and	40	<input type="checkbox"/>	

Sprint Capacity Planning

This plugin helps you do capacity planning for your teams for current and future sprints. This tool also gives you the leverage to add team members directly to any sprint rather than explicitly adding members to respective Teams.

Baseline Capacity Plan

Once you done with your sprint plan and do not need any more modifications, you can baseline your plan and monitor it over the sprint. Time Spent, Remaining Hours and Plan Variance of individual resources keep getting updated dynamically throughout the sprint.

Release	Name	Time Spent	Sprint
v1	IC2	0	Sprint4
v1	IC3	0	OR Sprint2
v1	IC4	0	OR Sprint2
v1	OR-4 - Bug 1	0	OR Sprint2
v1	WED-4 - test 1 epic	0	Sprint4
v1	OR-40 - Sprint Setting	0	Sprint4
v1	OR-19 - test a2 j	0	Sprint4
v1	OTD-12 - Speed test for release take force Think build develop Speed test for release take force Think build develop	5	OTD Sprint1
v1	OTD-4 - Test	5	OTD Sprint1
v1	OTD-4 - Test Speed Checks a new instance of the Field object	0	OTD Sprint1

Reporting

For reporting purpose, this plugin gets you the Time spent per Epic, which is further broken down to Stories, per release version.

Many more reports coming up in future versions.
